

# G500

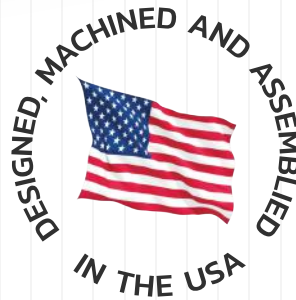

14" UV GERMICIDAL COIL CLEANER WITH MAGNET

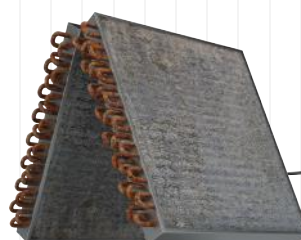

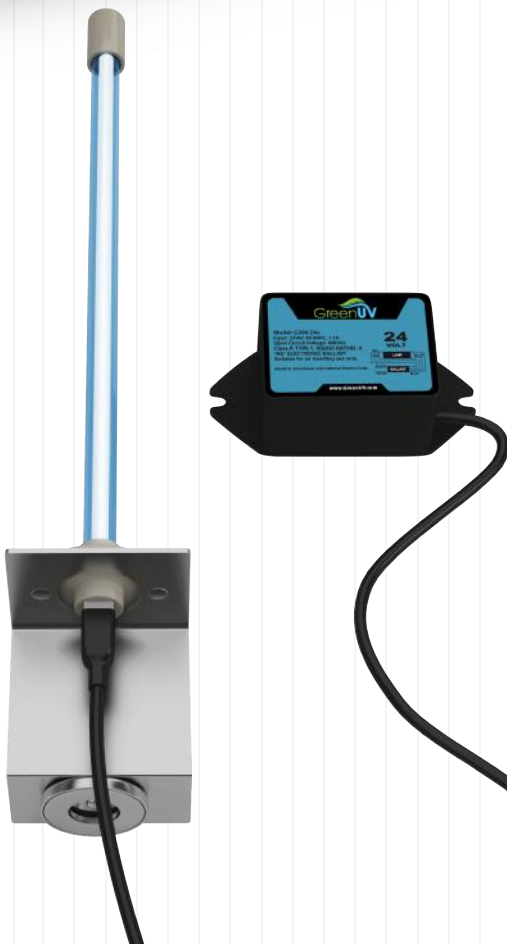

Your Solution to  
**Indoor Pollution**

## Why Choose Ultraviolet Light?

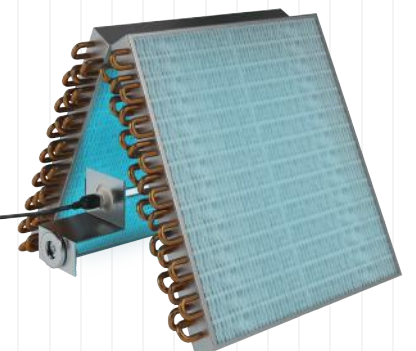

The air within your home is constantly recirculated, meaning it's actually only moved from room to room, and never really refreshed or replaced with fresh air. This creates serious health concerns, including the quick spread of mold, viruses, bacteria and allergens through your home. Poor indoor air quality has been linked to a myriad of health conditions, including asthma, allergies, upper respiratory infections, and more.

**14" UV GERMICIDAL COIL CLEANER**  
is designed to clean the evaporator coil and surrounding areas.

AC Coil without UV light

**AC Coil with UV Light**

# What happens with Low Indoor Air Quality?

Poor indoor air quality has been linked to a very wide range of issues, including the following:

- Chronic respiratory health issues
- Fatigue/tiredness
- Coughing/sneezing
- Asthma
- Nausea
- Depression/irritability
- Sinus infections/allergy issues

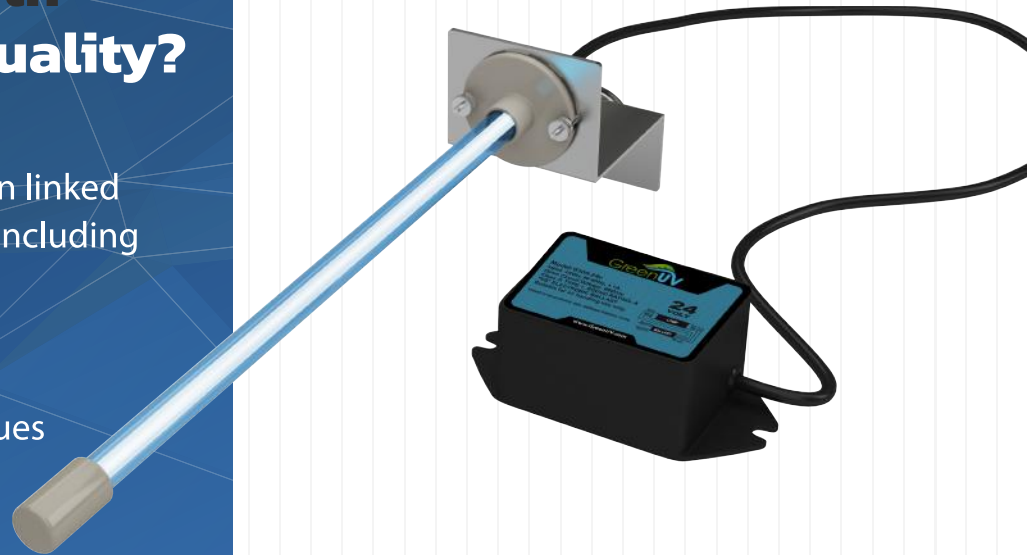

The Green UV G500 UV light purification system is the answer to these health concerns and more.

## G500

Save energy and improve HVAC efficiency by keeping components clean and sterilized. Costs no more to operate than energy saving fluorescent lights. Sterilize and reduce airborne microorganism as they pass through the system. Kill millions of bacteria, viruses, allergens and mold in the air to help breathe easier.

*\*Available in 24v / 120v power input.*

**Promote Health and Save Energy.**

Poor indoor air quality and bacteria contamination can have a profound effect on your life, health and physical well-being.

This system will prevent mold, mildew, allergies and more.

**The Green UV G500 Germicidal System is the perfect solution for cleaning the air in your household.**
