Consult your owner's manual for complete installation instructions and proper clearances to combustible materials. Check all local and national building codes and gas regulations. All specifications are subject to change without prior notice due to on-going product improvements. Products may not be exactly as shown. Flame height and activity is influenced by varying vent configurations and may not appear as shown. Napoleon® is a registered trademark of Wolf Steel Group Inc. EnerGuide - A Canadian efficiency standard based on frequent, short start-up and cool-down cycles. All appliances sold in Canada are subject to this EnerGuide rating system. AFUE- A US efficiency standard (Department of Energy) based on extended on/off cycles, more typical of fireplace usage. Steady State - Reflects the highest possible overall heating efficiency.

CONTROLS

EFIRE MOBILE APP: Providing a more connected and convenient experience by controlling every setting right from your mobile device. This includes: on/off, flame height and blower speed, top light and more!

REMOTE: Included remote controls every function of your fireplace including; on/off, thermostat, flame, top lights, and blower speed.

HEAT MANAGEMENT

UNIVERSAL HEAT MANAGEMENT (UHM): This system operates electricity-free and without blowers, utilizing a set of ducts to efficiently circulate heat throughout the room, rather than blowing it directly from the front of the fireplace. Additionally, the Universal Heat Management (UHM) system lowers clearances for combustibles and enables the safe installation of electronics above the fireplace.

HOT AIR DISTRIBUTION KIT: Efficiently moves warm air from the fireplace to a different room or outdoors using flexible ducting.

INNOVATIONS

BATTERY BACK-UP CONTROL: In the event of a loss of power, your fireplace will still light and keep you warm (batteries are not included but you can charge with your own power bank).

DIRECT VENT: Effectively removes exhaust and fumes from your space, keeping your indoor air clean while also conserving energy.
