2-2. AIR CLEANING FILTER (ANTI-ALLERGY ENZYME FILTER)

Back side of air filter

Clean every 3 months:

- Remove dirt by a vacuum cleaner.
- Install the tabs into the intake grille hole.

When dirt cannot be removed by vacuum cleaning:

- Soak the filter and its frame in lukewarm water before rinsing it.
(Diluted mild detergents can be used when dirt cannot be removed.)
- After washing, dry it well in shade.

Every year:

- Replace it with a new air cleaning filter for best performance.

NOTE:

- Clean the filters regularly for best performance and to reduce power consumption.
- Dirty filters cause condensation in the air conditioner which will contribute to the growth of fungi such as mold.
