SPMC150	24133	110	60	598	3	550

CASTER LOCK

The fan should be used on a flat surface. Before starting the machine, be sure to lock the casters. Otherwise, the strong wind generated during operation may cause the fan to move or even tip over.

After installation please confirm the following

- 1. Whether the machine body is firmly installed and the screws of the locking accessories are tightened.
- 2. Whether there is abnormal vibration or noise during operation.
- 3. Ensure reliable grounding in accordance with domestic regulations.
- 4. Confirm the product power supply. Inputting the wrong voltage will damage the machine body.

After installation please confirm the following

- 1. Whether the machine body is firmly installed and the screws of the locking accessories are tightened.
- 2. Whether there is abnormal vibration or noise during operation.
- 3. Ensure reliable grounding in accordance with domestic regulations.
- 4. Confirm the product power supply. Inputting the wrong voltage will damage the machine body.

Before any maintenance or repair, unplug the plug of this machine. Make sure the machine is disconnected from the power supply before removing the protective cover.
