

Atmosphere Lint Trap

Models:

LT4
LT4S

Providing an Additional Layer of Protection

These Lint Traps add another layer of protection from a hazardous built-up of lint in the exhaust duct that could lead to a serious fire. Installed between the dryer and the dryer exhaust ventilator, these air filters catch lint that is missed by the dryer's lint screen ensuring that your dryer duct stays cleaner, and your dryer performs better.

KEY FEATURES

Ensures Dryer Efficiency - Equipped with a nylon, mesh screen that filters the air that feeds into the dryer exhaust fan.

Easy to Keep Clean - The 4" window enables you to monitor the lint accumulation, so you know when to clean the washable filter.

Ready for 4" Ducts - The powder-coated, 24Ga galvanized steel box has 4" duct adapters.

Easy to Install - With the finishing frame, installation is easy. The LT4S model is suitable for installation in a 2" x 4" wall.
